

LUCE ° TU

EVERY SPACE HAS ITS OWN LIGHT

EVERYONE DESERVES ITS OWN LIGHT

LUCE TU EXISTS TO FIND IT

LIGHT AS AN EXPRESSION OF SPACE

EVERY ENVIRONMENT HAS ITS OWN LUMINOUS IDENTITY.

LUCE TU nasce a Milano dall'idea di trasformare la tradizione artigianale locale in un nuovo modo di progettare la luce.

Non una semplice azienda, ma una sartoria della luce.

Non un luogo unico di produzione, ma una fabbrica diffusa fatta di botteghe artigiane e manifatture specializzate.

All'interno di questo network milanese, materiali nobili e lavorazioni d'eccellenza prendono forma grazie a mani esperte che custodiscono il sapere dell'alta manifattura italiana.

Ogni progetto nasce dall'ascolto dello spazio e della persona che lo abita.

Perché ogni ambiente ha una propria identità luminosa.

LUCE TU nasce per dare a ciascuno la sua luce.

LUCE TU was founded in Milan with the idea of transforming local craftsmanship into a new way of designing light.

Not simply a company, but a tailoring atelier for light.

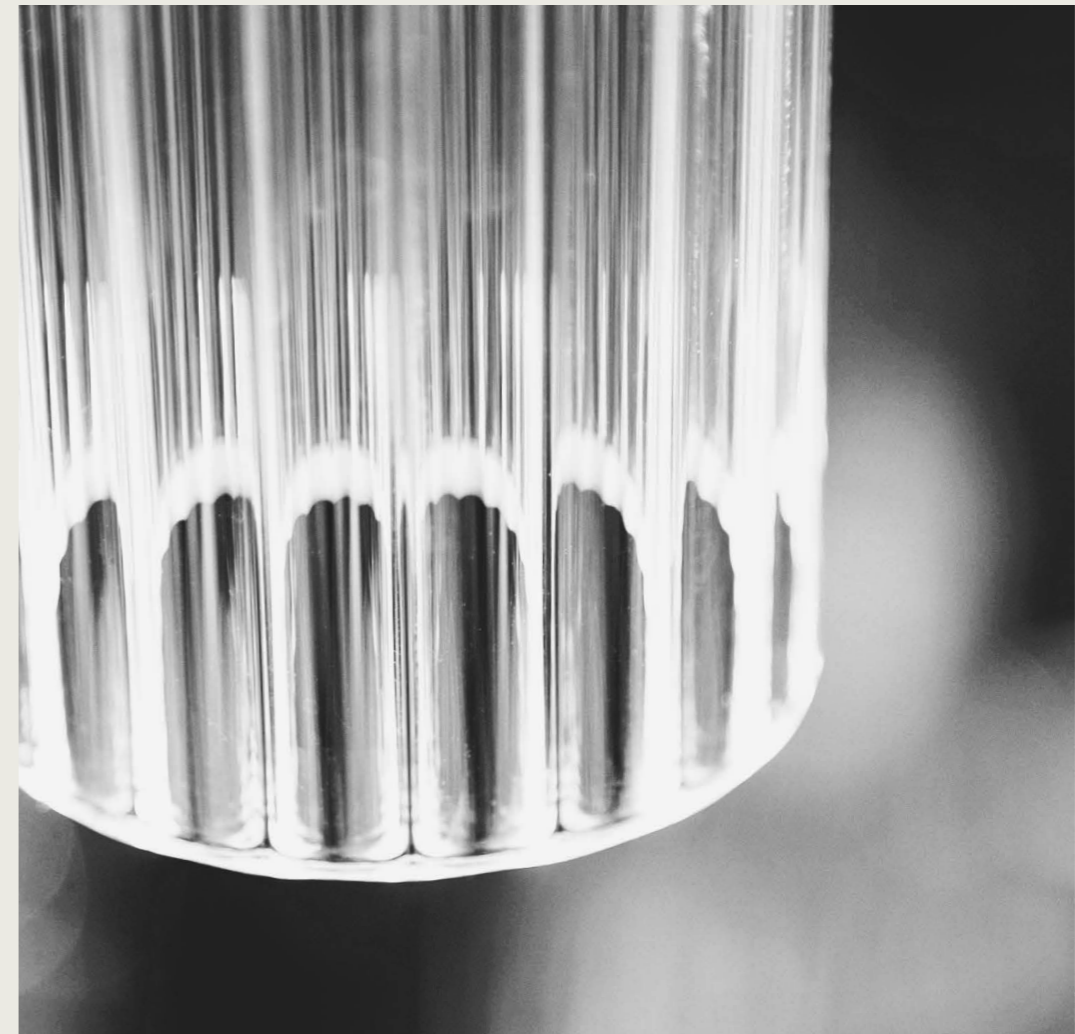

Not a single production site, but a distributed workshop composed of specialised artisans and manufacturers.

Within this Milanese network, noble materials and refined techniques take shape through expert hands that preserve the heritage of Italian high craftsmanship.

Each project begins by listening to the space and the people who inhabit it.

Because every environment has its own luminous identity.

LUCE TU exists to give everyone their own light.

MILANO, CAPITAL OF DESIGN

WHERE DESIGN CULTURE MEETS CRAFTSMANSHIP.

Milano è il punto di partenza di LUCE TU.

Capitale italiana del design e della moda, la città custodisce una lunga tradizione estetica che ha contribuito a definire il linguaggio del progetto contemporaneo. Qui convivono cultura industriale, botteghe artigiane storiche e realtà manifatturiere altamente specializzate.

È all'interno di questo ecosistema creativo che nasce il network produttivo di LUCE TU: una rete di artigiani e aziende che lavorano vetro, metallo, tessuti e materiali preziosi con maestria tramandata da generazioni.

La stessa cultura della manifattura che rende riconoscibile nel mondo l'eccellenza dei grandi brand italiani.

Milan is LUCE TU's starting point.

As Italy's capital of design and fashion, the city holds a long aesthetic tradition that has helped shape the language of contemporary design.

Here, industrial culture coexists with historic workshops and highly specialised manufacturers.

Within this creative ecosystem, LUCE TU's production network takes shape: a constellation of artisans and companies working glass, metal, textiles and precious materials with expertise passed down through generations.

The same culture of craftsmanship that defines the excellence of the world's most renowned Italian brands.

HANDS SHAPING LIGHT

CRAFTSMANSHIP AS A LIVING CULTURE.

LUCE TU opera come una fabbrica diffusa.

Un network produttivo composto da botteghe artigiane e manifatture specializzate che custodiscono i segreti dell'alta lavorazione milanese.

Vetro soffiato, ottone lavorato, pietre naturali e metalli preziosi vengono trasformati attraverso tecniche tramandate nel tempo.

Ogni lampada è il risultato di una collaborazione tra progetto, materia e competenza artigianale.

LUCE TU operates as a distributed workshop.

A production network composed of artisanal ateliers and specialised manufacturers that preserve the secrets of Milanese craftsmanship.

Blown glass, crafted brass, natural stone and noble metals are shaped through techniques passed down over generations.

Each lamp results from the dialogue between design, material and artisanal expertise.

FROM SKETCH TO LIGHT

WHERE IDEAS TAKE SHAPE.

Ogni creazione LUCE TU nasce da uno schizzo.

Da questa prima intuizione prende avvio un processo progettuale che coinvolge il nostro network artigianale per individuare materiali e lavorazioni capaci di valorizzare l'idea iniziale.

Il prototipo viene sviluppato, ingegnerizzato e perfezionato fino a diventare una lampada pronta a entrare nello spazio.

Da qui il progetto può evolversi in un pezzo unico su misura oppure in una mini collezione pensata per il contract.

Every LUCE TU creation begins with a sketch.

From this first intuition, a design process unfolds involving our artisanal network to identify materials and techniques capable of enhancing the original idea.

The prototype is developed, engineered and refined until it becomes a lamp ready to inhabit a space.

From here the project may evolve into a unique bespoke piece or a small collection developed for contract environments.

TIMELESS SHAPES

DESIGN ROOTED IN CRAFTSMANSHIP.

Le collezioni LUCE TU interpretano il linguaggio del neo-classico contemporaneo. Forme essenziali, materiali nobili e lavorazioni artigianali si combinano per dare vita a lampade pensate per attraversare il tempo con eleganza. Oggetti luminosi che dialogano con l'architettura e contribuiscono a definire l'atmosfera dello spazio.

LUCE TU collections express a contemporary neo-classical language. Essential forms, noble materials and artisanal craftsmanship come together to create lamps designed to endure over time with elegance. Luminous objects that interact with architecture and help shape the atmosphere of space.

DOM

DOM

ARCHITECTURE TRANSFORMED INTO LIGHT

Ispirata al simbolo più iconico di Milano, la collezione Dom unisce rigore formale e ricchezza materica. Vetro borosilicato, ottone e sfere di pietra si combinano in una composizione elegante che richiama l'equilibrio tra architettura, tradizione e design contemporaneo.

Inspired by Milan's most iconic symbol, Dom combines formal rigour with refined materials. Borosilicate glass, brass and stone spheres create an elegant composition reflecting the balance between architecture, tradition and contemporary design.

SBARLUSC

A SMALL GESTURE OF LIGHT

Nel dialetto milanese sbàrlusc indica il luccichio improvviso di un oggetto prezioso. La collezione interpreta questa suggestione creando una lampada capace di diffondere una luce morbida e avvolgente.

In Milanese dialect sbàrlusc describes the sudden sparkle of a precious object. The collection translates this idea into a lamp that emits a soft and enveloping glow, able to enhance the space with charm and refinement.

CRAPA

BALANCE AND HARMONY

Ispirata alla tradizione popolare milanese, Crapa si distingue per forme morbide e perfettamente bilanciate. Le sfere di vetro dialogano con dischi metallici lavorati con precisione artigianale.

Inspired by Milanese popular tradition, Crapa is defined by soft and perfectly balanced shapes. Glass spheres interact with finely crafted metal discs.
